

IBCon 2016- Featured Speaker

# AQUANOMIX

*Connected Water – Monitoring and Managing Goes High-Tech*

---

Aquanomix has been chosen as a water industry expert at Intelligent Building's IBCon- the Smart, Connected, High Performance Intelligent Buildings Conference. Managing Partner **Robert O'Donnell** will be a featured speaker.

---

## ABOUT THE SESSION

In the last 18 months, we've seen a major new eco-movement coming in right behind energy conservation, and its name is water. People are beginning to realize that water may be the most precious natural resource, and wasting it is no longer an option. New solutions that connect water systems (including irrigation, drinking, greywater, and sanitary) and metering technologies have jumped into the smart building discussion. Some of the early applications include consumption analytics, reuse and optimization, leak detection, and remote quality monitoring and control. Applying IoT to irrigation systems integrated into weather data is just one of the exciting topics to be examined in this session.

**Robert O'Donnell**  
Aquanomix

**Matt Jernigan**  
Wells Fargo

**Laurie Conner**  
The Detection Group

**Jim Sinopoli (Mod)**  
Smart Buildings

**June 23, 2016 2:00-3:00 PM**

San Jose Convention Center  
150 W. San Carlos St.  
San Jose, CA 95113
